### EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Kolakowski III on January 9, 2008.

The application has been amended as follows:

In the Claims:

Claim 1. A system for processing applications from customers for manufacture of vehicle parts by a manufacturer, comprising:

a first server configured to generate an application interface on a customer client in communication with said first server through a first network and to receive a first completed application for manufacture of a first part of a vehicle from said customer through said customer client using said application interface, said first completed application having information including a first set of information regarding operating conditions of said vehicle, a second set of information defining specifications for said first part, and a third set of information regarding a second part of said vehicle functionally interrelated with said first part of said vehicle;

wherein said first server is further configured to transmit to said customer client, responsive to a request received from said customer client, electronic links to prior

applications of said customer and to order said electronic links in accordance with one of a plurality of criteria selected by said customer through said customer client.

Claim 25 is cancelled.

### REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Regarding claim 1

The prior art of record neither anticipates nor fairly and reasonably teaches a first server configured to transmit to a customer client, responsive to a request received from said customer client, electronic links to prior applications of said customer and to order said electronic links in accordance with one of a plurality of criteria selected by said customer through said customer client.

The most remarkable prior art of record is to Utsugi et al. (US 2002/0099588) and Bury et al. (US 2003/0004768). Although Utsugi disclosed many features similar to those recited in the above-indicated claims, Utsugi still fails to teach the above-noted features in the above-noted claims.

Bury et al. teaches a system for estimating the manufacturing cost of components.

It is clear from the description of Bury et al. that the prior art does not consider the possibility of a first server configured to transmit to a customer client, responsive to a request received from said customer client, electronic links to prior applications of said customer and to order said electronic links in accordance with one of a plurality of criteria selected by said customer through said customer client, as recited in the independent claim 1.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

US 2005/0187834 to Painter et al. discloses an on-line location and transaction system for equipment manufacture is adapted to be integrated with business management computer system sotware.

"Auto Retailers Post Gain in Net Aided by Consumer Confidence" by Karen Lundegaard discloses a system for ordering vehicles from the auto makers.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
